Professional Summary

Data Scientist with 4+ years at Meta and Bell Mobility, driving multimillion-dollar impact through AI-powered automation, predictive analytics, and stakeholder management for executive audiences across the Americas. Skilled in Python, SQL, cloud data platforms, and LLM applications, leading cross-functional initiatives from experimentation to production.

Experience

Partner Data Scientist | Meta Platforms | Menlo Park, CA July 2025 – July 2026

- Advised senior executives at major US and LATAM telecom carriers, translating large-scale consumer and network analytics into actionable business recommendations.
- Built an AI-powered partner health monitoring tool that won an internal hackathon, automating contextual follow-up recommendations and saving the team 15+ hours monthly.
- Accelerated a partner's Hispanic market expansion by building a language segmentation model using internal ML systems and US Census benchmarks, directly informing advertising creative strategy.
- Engineered a scalable global FIFA World Cup reporting pipeline and dashboard with dynamic regional hosting insights, eliminating 100+ hours of manual reporting per event cycle.
- Led generative AI upskilling for 25 analysts, establishing certification standards, evaluation frameworks, and workshops that boosted AI tool adoption while ensuring accuracy compliance.

Data Scientist | Bell Mobility | Toronto, Canada May 2023 – July 2025

- Led a cross-company initiative to build an in-house crowdsourced data solution, eliminating third-party data purchases and delivering \$2M in annual cost savings.
- Optimized network performance by identifying iCloud congestion during high-traffic events in collaboration with Apple's engineering team; developed a mitigation strategy reducing impact by 28%.
- Built executive dashboards integrating multi-source data to prioritize high-impact product and engineering opportunities, adopted by 40+ stakeholders across teams.
- Led a strategic data partnership with Meta to enhance their customer experience portal, enabling data-driven decision-making and improving operational efficiency.

Education

M.S. of Data Science May 2027
Illinois Institute of Technology

B.S. Honors Specialization in Statistics May 2023
Western University

Skills

Methods:	Statistical Modeling, A/B Testing, Causal Inference, Predictive Analytics, Segmentation, Clustering, Classification/Regression, Market Analysis, Experimentation
Programming:	Python, R, SQL
Data Engineering:	Dataswarm, ETL Pipelines, Data Warehousing, Spark
Visualization:	Tableau, Grafana, Executive Dashboards
AI/ML & Cloud:	Generative AI, LLM Prompting & Evaluation, Scikit-Learn, Automated Workflows, Google Cloud Platform, Git, Airflow
